

# **Hybrid Revit Model Features**

The Hybrid Revit model includes the following option in the Model Properties Category in the Properties Window:

1. “Show Wall Sleeve and Louvre” lets you add the matched wall sleeve and external weather louvre onto to model automatically and add the parts individually to your mechanical equipment schedule.

2. The Revit model included in this zip file contains all three unit codes in the same model:  
XB-H130M  
XB-H130S  
XB-H260

These are accessible from the model's properties window once inserted into the project
