

Hybrid LPHW Module Revit Model Features

The Hybrid LPHW Module Revit model includes the following option in the 'Model Properties Category' in the Properties Window:

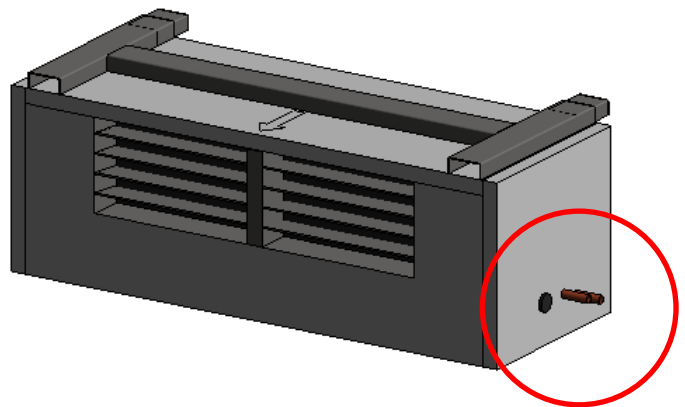

1. "Left Hand Coil Connections" lets you swap the pipe tails from the default right hand configuration to the left hand if this is preferred.

Left Hand Coil Connections ☐

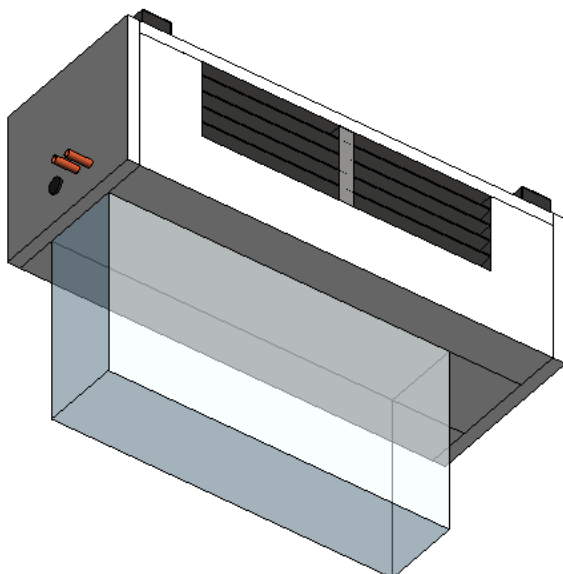

Left Hand Coil Connections ☒

2. "Show Access Clearance" allows you to turn on and off the transparent access clearance area that denotes the underneath of the valve and actuator access pane.
