# nuaire MRXBOX95-WM1
Revit Model Features

1. The model uses a type catalogue so all variants of the MRXBOX95-WM1 range can be inserted using the same .rfa file (see Read Me file attached for further info)

    The mrxbox-wm1.rfa model attached includes the following options in the Model Properties category in the Properties window

2. '**Show Access Clearance**' allows you to show or hide the access clearance transparent area of the model. This clearance area will still affect collision detection when turned off.

3. If the model is inserted into the project without using the correct type catalogue procedure then you will be alerted via a red box and '**DO NOT USE**' wording around the model. Please then refer to the additional 'Please read Me File' packaged with this family.
