

COOKERHOOD-SS-B

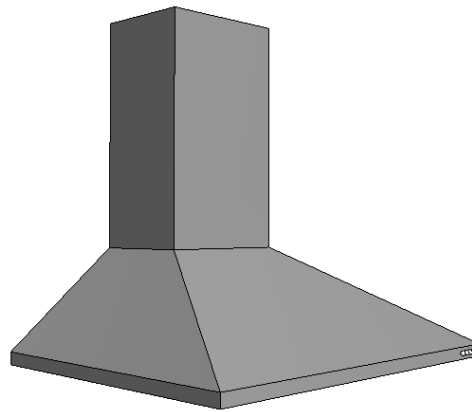

Revit Model Features

- The Height dimension refers to the overall height of the hood including the chimney. The maximum height for this unit is 940mm and the minimum height is 573mm.
(Using dimensions outside of these limits will be ignored by the model and the max/min values will be maintained.)

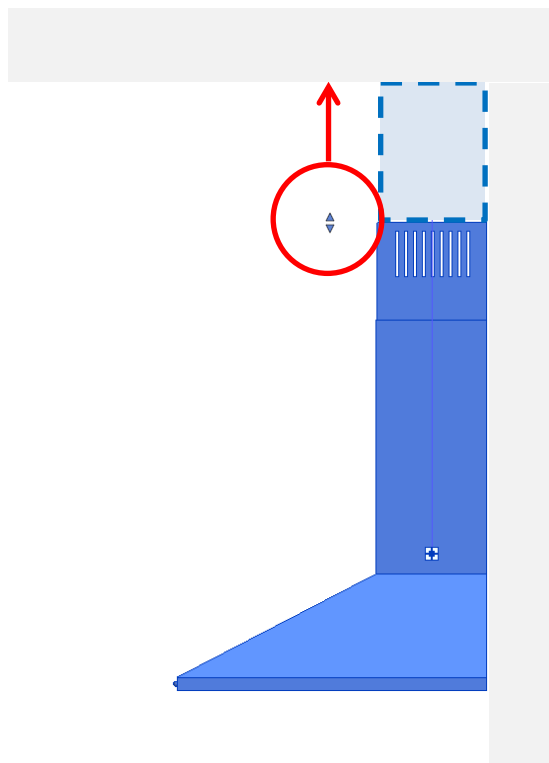

| Dimensions | |
|------------|-------|
| Height | 940.0 |

| Dimensions | |
|------------|-------|
| Height | 573.0 |

- You can manually drag the top of the chimney up and down from the side elevations if preferred.

2. The 'Show Worktop Clearance' tick box in the model's properties window allows you to turn on the minimum 650mm clearance recommended to the worktop surface below.

This is both a visual guide and a clash detection object if required.
